

PRODUCT CATALOGUE — 2026 EDITION

Equipping care, from first aid to theatre.

389 products across 19 ranges, from diagnostics and critical care to imaging, laboratory, specialty clinics, furniture and consumables.

01	02	03	04	05
Diagnostics & Monitoring	Critical Care & Theatre	Imaging & Laboratory	Specialty Clinics	Furniture & Consumables

WHO WE ARE

Your partner in medical supply.

Texacore supplies medical and surgical equipment to hospitals, clinics, laboratories and emergency services, from everyday consumables to imaging, critical care and theatre systems.

This catalogue brings together 389 products across 19 ranges. Every item is sourced to your requirement and quoted with the model, configuration and lead time that suit your facility.

Alongside medical equipment, Texacore trades in safety and PPE, firefighting, industrial and petrochemical, and marine supplies, serving customers across the GCC, Africa and South Asia.

COMPANY	Texacore FZE
HEADQUARTERS	Dubai, UAE
PRODUCT LINE	Medical & surgical equipment
WE SUPPLY	Hospitals, clinics, labs & EMS
ORDER VIA	WhatsApp, phone or email

01

One-Stop Sourcing

From gloves to CT scanners, one supplier and one point of contact for the whole facility.

02

Quoted to Your Spec

Tell us the model, brand or performance you need and we match it, with clear pricing and lead times.

03

Regional Reach

Supplying customers across the UAE, the GCC, Africa and South Asia.

01.31	PPE Dispenser	09
01.32	Manikin	09

01.01

Digital BP Machine

Automatic upper-arm monitor that measures blood pressure and pulse at the press of a button.

- One-touch measurement
- Clinic & home use

01.02

Stethoscope

Dual-head acoustic stethoscope for listening to heart, lung and bowel sounds.

- Diaphragm & bell
- Everyday clinical tool

01.03

Mercury BP Machine

Traditional mercury-column sphygmomanometer for accurate manual blood pressure readings.

- Manual reference reading
- Protective case

01.04

Mobile Aneroid BP

Aneroid blood pressure gauge on a rolling five-caster stand for bedside readings.

- Large easy-read dial
- Moves bed to bed

01.05

Nebulizer

Compressor nebulizer that turns liquid medication into a fine mist for inhalation.

- Mask & mouthpiece use
- Asthma & COPD care

01.06

Glucometer

Handheld blood glucose meter giving fast readings from a small fingertip sample.

- Test-strip based
- Diabetes monitoring

01.07

IR Thermometer

Non-contact infrared thermometer for quick forehead temperature screening.

- Reading in seconds
- No patient contact

01.08

Pulse Oximeter

Fingertip oximeter showing oxygen saturation (SpO2) and pulse rate on a bright display.

- SpO2 & pulse rate
- Compact & portable

01.09

Sanitizer / Soap Dispenser

Wall-mounted dispensers for hand sanitizer or liquid soap at the point of care.

- Wall mounted
- Hand hygiene

01.10

Gel Warmer

Warms ultrasound gel bottles to a comfortable temperature before scanning.

- Multi-bottle warming
- Patient comfort

01.11

Ambu Bag

Self-inflating bag-valve-mask resuscitator for manual ventilation in emergencies.

- With face mask
- Adult & paediatric sizes

01.12

IR Light

Infrared heat lamp delivering soothing warmth for muscle and joint pain relief.

- Adjustable head
- Therapy & home use

01.13

Handheld Pulse Oximeter

Handheld oximeter with finger probe for SpO2 and pulse monitoring on the move.

- Separate finger sensor
- Ward & transport use

01.14

Ear Thermometer

Tympanic thermometer that reads body temperature from the ear canal in seconds.

- Fast tympanic reading
- Ideal for children

01.15

Crash Cart

Emergency trolley with colour-coded drawers that keeps resuscitation kit ready to go.

- Drawers & worktop
- IV pole & sharps holder

01.16

Gas Blender

Air-oxygen blender that mixes gases to a set oxygen concentration for respiratory support.

- Adjustable FiO2
- NICU & ICU use

01.17

Laryngoscope

Laryngoscope handle with interchangeable curved blades for viewing the airway during intubation.

- Multiple blade sizes
- Anaesthesia & ER

01.18

Otoscope

Illuminated otoscope for examining the ear canal and eardrum.

- Magnifying lens
- ENT & primary care

01.19

Video Laryngoscope

Intubation scope with a camera and screen that gives a clear view of the vocal cords.

- Integrated display
- Difficult airways

01.20

Ophthalmoscope

Handheld direct ophthalmoscope for examining the retina and optic disc.

- Selectable lenses
- Eye & GP clinics

01.21

Vein Viewer

Near-infrared vein finder that maps veins on the skin to guide IV access and blood draws.

- Non-contact imaging
- Phlebotomy & paediatrics

01.22

3-in-1 Analyzer

Compact point-of-care analyzer for quick multi-parameter testing at the bedside or clinic.

- Point-of-care testing
- Clinic & community use

01.23

X-Ray Viewer

LED film illuminator for reading X-ray films with even, bright light.

- Slim LED panel
- Radiology & orthopaedics

01.24

Examination Light

Adjustable LED examination lamp for focused light during check-ups and minor procedures.

- Flexible positioning
- Bright LED light

01.25

Dermatoscope

Illuminated dermatoscope for magnified examination of moles and skin lesions.

- LED illumination
- Skin screening

01.26

Pen Torch

Slim pen torch for pupil reflex checks and throat examination.

- Pocket clip
- Everyday diagnostics

01.27

Suction Machine

Portable suction unit for clearing airway secretions and fluids.

- Collection jar
- Ward, ER & home care

01.28

Ward Screen

Folding multi-panel privacy screen on castors for wards and examination rooms.

- Wipe-clean curtains
- Folds for storage

01.29

Pressure Regulators

Oxygen regulator with flowmeter that controls delivery from a cylinder to the patient.

- Gauge & flowmeter
- Cylinder mounted

01.30

Oxygen Cylinder

Medical oxygen cylinder on a wheeled trolley for bedside and transport use.

- With trolley
- Ward & ambulance

01.31

PPE Dispenser

Wall-mounted station holding gloves, masks and aprons at the point of care.

- All-in-one PPE station
- Infection control

01.32

Manikin

Adult, child and infant CPR training manikins supplied with a carry bag.

- Realistic CPR practice
- First-aid courses

02.32	Laparotomy Sponges	14

02.01

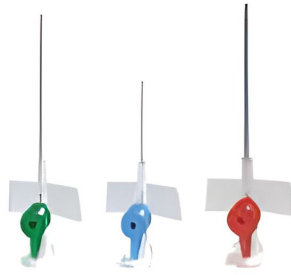

Disposable Syringe

Sterile single-use syringe for accurate drawing and injection of medication.

- Clear graduations
- Range of sizes

02.02

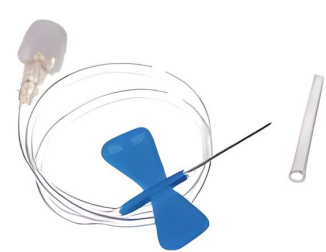

IV Cannula

Colour-coded peripheral IV cannula for fluid, drug and blood administration.

- Colour-coded gauges
- Sterile, single use

02.03

Scalp Vein Set

Butterfly needle with flexible tubing for short infusions and gentle blood draws.

- Winged grip
- Paediatric friendly

02.04

3-Way Extension

Three-way stopcock with extension line to connect several IV lines to one access point.

- Rotating valve
- Luer connections

02.05

Adhesive Bandage

Elastic adhesive bandage for securing dressings and light compression.

- Conforms to joints
- Strong hold

02.06

Micropore Tape

Gentle, breathable paper surgical tape for fixing dressings on sensitive skin.

- Skin friendly
- Easy tear

02.07

Cohesive Bandage

Self-adhering elastic wrap that sticks to itself, not to skin or hair.

- No clips needed
- Assorted colours

02.08

Cotton Roll

Absorbent cotton wool roll for padding, cleaning and wound care.

- Highly absorbent
- Clinic & ward use

02.09

Cotton Balls

Soft, absorbent cotton balls for skin cleansing and applying antiseptics.

- Soft & absorbent
- Convenient packs

02.10

Gloves

Disposable examination gloves that protect against cross-contamination.

- Range of sizes
- Single use

02.11

Face Mask

Three-ply disposable face masks with ear loops for infection control.

- 3-ply protection
- Dispenser boxes

02.12

Kidney Tray

Kidney-shaped dish for instruments, dressings and clinical waste.

- Easy to clean
- Procedure rooms

02.13

Blood Bag

Sterile blood bag for collecting, storing and transfusing donated blood.

- Needle & tubing set
- Blood bank use

02.14

Urine Bag

Graduated urine drainage bag with outlet for catheterised patients.

- Volume markings
- Ward & home care

02.15

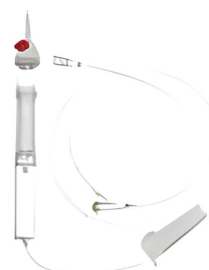

Adult Diaper

Absorbent adult incontinence briefs for comfort and dignity in patient care.

- Leak protection
- Range of sizes

02.16

Blood Transfusion Set

Transfusion set with filter chamber for safe administration of blood products.

- Built-in filter
- Sterile, single use

02.17

ET Tubes

Cuffed endotracheal tubes that secure the airway during ventilation and anaesthesia.

- Range of sizes
- Theatre & ICU

02.18

Guedel Airway

Oropharyngeal airway that stops the tongue blocking the airway in unconscious patients.

- Colour-coded sizes
- Emergency & theatre

02.19

Tracheostomy Tube

Cuffed tracheostomy tube for long-term airway access and ventilation.

- Neck flange
- ICU & ENT

02.20

Nelaton Catheter

Straight-tip catheter for intermittent bladder drainage.

- Colour-coded sizes
- Single use

02.21

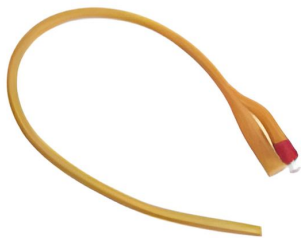

Suction Catheter

Flexible catheter for clearing secretions from the mouth, nose and airway.

- Thumb control valve
- Sterile packed

02.22

Urine Catheter

Two-way Foley catheter with a retention balloon for continuous bladder drainage.

- Retention balloon
- Range of sizes

02.23

Colostomy Bags

Ostomy pouches that collect output from a stoma after colostomy surgery.

- Skin-friendly base
- Discreet & secure

02.24

Under Pads

Disposable absorbent underpads that protect beds, couches and chairs.

- Leak-proof backing
- Bed & couch use

02.25

Burette Set

Measured-volume IV burette set for precise fluid and drug dosing.

- Graduated chamber
- Paediatric infusions

02.26

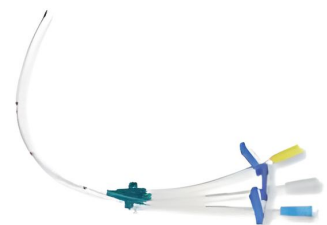

Crepe Bandage

Stretchable cotton crepe bandage for compression and support of sprains.

- Reusable
- Firm support

02.27

Triple Lumen Catheter

Central venous catheter with three lumens for simultaneous infusions and monitoring.

- Three separate lines
- ICU & theatre

02.28

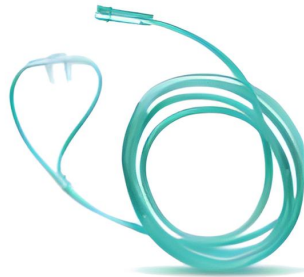

Nebulizer Mask

Aerosol mask with medication cup and tubing for nebulizer therapy.

- Soft, clear mask
- Adult & child sizes

02.29

Nasal Cannula

Soft two-prong nasal cannula for low-flow oxygen delivery.

- Light & comfortable
- Supply tubing

02.30

Oxygen Mask

Face mask with adjustable strap and tubing for higher-concentration oxygen.

- Adjustable nose clip
- Supply tubing

02.31

Gauze Bandage

Absorbent cotton gauze roll for dressing and wrapping wounds.

- Breathable
- Wound care

02.32

Laparotomy Sponges

Absorbent surgical sponges with marker loop for use in open surgery.

- Highly absorbent
- Theatre use

PRODUCT RANGE 03 / 19

Cardiology

Every beat, measured and managed.

FIG. 03 — DEFIBRILLATOR

From resting ECG to catheter labs, equipment that diagnoses, monitors and treats the heart.

IDEAL FOR

Cardiology units

Emergency rooms

ICU & CCU

Cardiac clinics

IN THIS RANGE — 16 PRODUCTS

PAGES 16-17

03.01	Cathlab Unit	16
03.02	Heart-Lung Machine	16
03.03	ECG Machine	16
03.04	Defibrillator	16
03.05	Echo Cardio	16
03.06	Stress Test Machine	16

03.07	AED Machine	16
03.08	PT-INR Machine	16
03.09	Pulse Oximeter	16
03.10	ABP Unit	17
03.11	Portable ECG	17
03.12	Holter Monitor	17

03.13	Chest Compression Device	17
03.14	Pacemaker	17
03.15	AED Pads	17
03.16	ECG Cables with Accessories	17

03.01

Cathlab Unit

Angiography system for diagnostic and interventional cardiac procedures such as angioplasty.

- Ceiling-mounted C-arm
- Interventional cardiology

03.02

Heart-Lung Machine

Cardiopulmonary bypass system that takes over heart and lung function during surgery.

- Perfusion pumps
- Open-heart surgery

03.03

ECG Machine

Multi-channel electrocardiograph that records and prints the heart's electrical activity.

- Built-in printer
- Resting ECG

03.04

Defibrillator

Monitor-defibrillator that delivers controlled shocks to restore a normal heart rhythm.

- Monitor & paddles
- ER, ICU & ward

03.05

Echo Cardio

Cardiac ultrasound system for imaging heart chambers, valves and blood flow.

- Colour Doppler
- Cardiology clinics

03.06

Stress Test Machine

Treadmill stress ECG system that monitors the heart during controlled exercise.

- Treadmill & ECG station
- Exercise testing

03.07

AED Machine

Automated external defibrillator with voice prompts that guide rescuers step by step.

- Voice-guided rescue
- Public access

03.08

PT-INR Machine

Point-of-care coagulation meter for PT/INR testing in patients on blood thinners.

- Fingertick sample
- Anticoagulation clinics

03.09

Pulse Oximeter

Fingertip oximeter for quick SpO2 and pulse checks during cardiac assessment.

- SpO2 & pulse rate
- Portable

03.10

ABP Unit

Ambulatory blood pressure monitor that records BP automatically over 24 hours.

- Wearable recorder
- Hypertension diagnosis

03.11

Portable ECG

Handheld ECG device for fast, on-the-spot heart rhythm recording.

- Pocket size
- Screening & home visits

03.12

Holter Monitor

Wearable recorder that captures continuous ECG over 24 hours or longer.

- Continuous recording
- Arrhythmia detection

03.13

Chest Compression Device

Mechanical CPR device that delivers consistent, uninterrupted chest compressions.

- Hands-free CPR
- EMS & ER

03.14

Pacemaker

Implantable pacemaker that regulates slow or irregular heart rhythms.

- Implantable device
- Electrophysiology

03.15

AED Pads

Replacement electrode pads that keep automated external defibrillators rescue-ready.

- Ready-to-use pads
- AED programmes

03.16

ECG Cables with Accessories

ECG lead wires, limb clamps and chest electrodes for connecting patients to ECG machines.

- Clamps & chest bulbs
- Replacement parts

04.12	Basket Stretcher	20
04.13	Splint Kit	20

04.01

Ambulance

Fully equipped ambulance vehicle for patient transport and pre-hospital care.

- Custom fit-out
- Emergency transport

04.02

Ambulance Stretcher

Height-adjustable wheeled stretcher that loads directly into an ambulance.

- Folding undercarriage
- Adjustable backrest

04.03

Stair Chair

Lightweight folding evacuation chair for carrying patients on stairs and in tight spaces.

- Folds flat
- Rear wheels

04.04

Electric Stair Chair

Powered stair-climbing chair that moves patients up and down stairs with less effort.

- Motorised tracks
- Less strain on crews

04.05

Scoop Stretcher

Split-frame stretcher that separates to slide under a patient with minimal movement.

- Adjustable length
- Spinal-injury care

04.06

Extrication Device

Vest-style immobiliser for safely removing patients from vehicles.

- Spinal immobilisation
- Road-traffic rescue

04.07

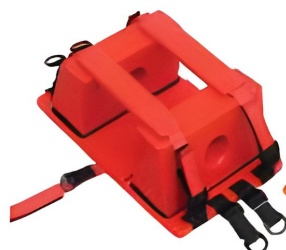

Emergency Bag

First-responder trauma bag with organised compartments for emergency kit.

- Multi-pocket layout
- High-visibility

04.08

Head Immobilizer

Head blocks with straps that stabilise the head and neck on a spine board.

- Universal fit
- Easy to clean

04.09

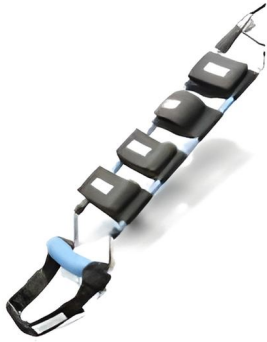

Vacuum Mattress

Full-body vacuum mattress that moulds around the patient for stable immobilisation.

- Moulds to body
- Carry handles

04.10

Traction Splint

Leg traction splint that stabilises femur fractures in the field.

- Adjustable length
- Pre-hospital care

04.11

Folding Stretcher

Lightweight folding stretcher for compact storage and quick deployment.

- Compact storage
- Carry handles

04.12

Basket Stretcher

Rigid rescue basket for lifting patients from heights, water or rough terrain.

- Lifting bridle
- Technical rescue

04.13

Splint Kit

Set of padded splints in assorted sizes for immobilising arm and leg fractures.

- Assorted sizes
- Quick application

05.01

Electric Hospital Bed

Motorised ward bed with electric height, backrest and knee adjustment.

- Handset control
- Side rails & castors

05.02

Manual Hospital Bed

Crank-operated adjustable bed for general wards.

- Manual cranks
- Side rails

05.03

Orthopedic Hospital Bed

Hospital bed with overhead traction frame for orthopaedic patients.

- Traction frame
- Adjustable sections

05.04

Infant Cradle

Mobile newborn cradle with a clear bassinet for maternity wards.

- Clear bassinet
- Easy to move

05.05

Electric Stretcher Trolley

Powered patient trolley with electric height adjustment for transfers and emergency care.

- Electric height
- Side rails

05.06

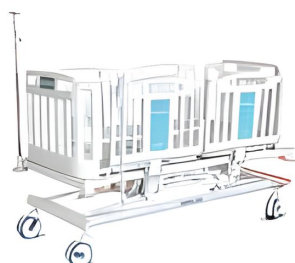

Manual Stretcher Trolley

Height-adjustable stretcher trolley with side rails for patient transfers.

- Adjustable backrest
- IV pole

05.07

Pediatric Bed

Children's hospital bed with high side rails for safety.

- High safety rails
- Adjustable sections

05.08

IV Stand

Height-adjustable stand on castors for hanging IV bags.

- Multi-hook top
- Five-castor base

05.09

Linen Trolley

Stainless steel trolley with bag holder for collecting soiled linen.

- Removable bag
- Shelf storage

05.10

Kick Bucket

Stainless steel bucket on a castor ring for dressings and fluids during procedures.

- Kick-to-move
- Stainless steel

05.11

Workstation Trolley

Mobile computer cart for bedside charting and documentation.

- Monitor mount
- Storage drawer

05.12

Doctor Chair

Height-adjustable swivel stool with backrest for clinicians.

- Gas-lift height
- Swivel castors

05.13

Wheelchair

Folding manual wheelchair for everyday patient mobility.

- Folding frame
- Footrests

05.14

Electric Wheelchair

Battery-powered wheelchair with joystick control for independent mobility.

- Joystick control
- Rechargeable battery

05.15

Dressing Trolley

Stainless steel two-shelf trolley for dressing and wound-care supplies.

- Two shelves
- Drawer & bowls

05.16

Foot Step

Two-step stool with handrail that helps patients onto beds and couches.

- Non-slip steps
- Handrail

05.17

Blood Donor Chair

Adjustable reclining chair for blood donation, infusion and phlebotomy.

- Adjustable armrests
- Reclining

05.18

Baby Changing Station

Wall-mounted fold-down baby changing table with safety strap.

- Folds flat
- Safety strap

05.19

Medicine Trolley

Mobile drawer trolley for storing and dispensing medicines on ward rounds.

- Multiple drawers
- Castors

05.20

Portable Massage Table

Folding padded table for massage and physiotherapy, with face cradle.

- Folds to carry
- Face cradle

05.21

Examination Couch

Padded examination couch with adjustable headrest.

- Steel frame
- Adjustable headrest

05.22

Anesthesia Cart

Drawer cart that organises anaesthesia drugs and airway supplies in theatre.

- Colour-coded drawers
- Side accessories

05.23

Medicine Cabinet

Steel cabinet with glass doors for organised medicine storage.

- Glass upper doors
- Lower storage

05.24

Bedside Cabinet

Compact bedside locker for patients' personal items.

- Drawer & cupboard
- Easy to clean

05.25

Recliner Chair

Comfortable reclining chair for patients and visitors in wards and day-care.

- Reclining backrest
- Mobile

05.26

Scrub Sink

Stainless steel surgical scrub sink for pre-operative hand washing.

- Stainless steel
- Twin stations

05.27

Dental Cabinet

Mobile drawer cabinet for dental instruments and materials.

- Multiple drawers
- Castors

05.28

Waiting Chair

Three-seat beam seating for hospital and clinic waiting areas.

- Steel beam frame
- Easy-clean seats

05.29

Mayo Trolley

Height-adjustable instrument tray stand used in operating rooms.

- Removable tray
- Stainless steel

05.30

Over Bed Table

Height-adjustable table that rolls over the bed for meals and reading.

- Adjustable height
- Castor base

05.31

Monitor Trolley

Mobile stand with mount and basket for patient monitors.

- Monitor mount
- Accessory basket

05.32

Biohazard Bin

Pedal-operated bins for infectious and biohazard waste.

- Foot-pedal lid
- Colour-coded

PRODUCT RANGE 06 / 19

Ophthalmology

Clear sight, from screening to surgery.

FIG. 06 — AUTO REFRACTOMETER

Refraction, diagnostic, imaging and optical workshop equipment for eye clinics and optical shops.

IDEAL FOR

Eye hospitals

Optometrists

Optical shops

School screening

06.31	Trial Lens Set	30
06.32	Trial Frame	30

06.01

Auto Refractometer

Automated refractometer that measures refractive error and corneal curvature.

- Touch-screen
- Keratometry

06.02

Auto Lensmeter

Automatic lensmeter that measures the power of spectacle and contact lenses.

- Digital readout
- Optical shops

06.03

Digital Slit Lamp

Slit lamp with digital imaging for detailed examination of the front of the eye.

- Image capture
- Patient records

06.04

Optical Coherence Tomography

OCT scanner producing cross-sectional images of the retina and optic nerve.

- Retinal layers
- Glaucoma & macula

06.05

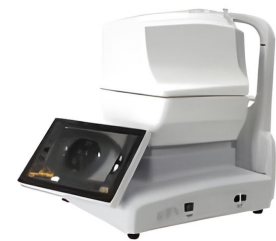

Auto Chart Projector

Projects visual acuity charts for distance vision testing.

- Remote controlled
- Multiple charts

06.06

Non-Contact Tonometer

Air-puff tonometer that measures eye pressure without touching the eye.

- No eye contact
- Glaucoma screening

06.07

Visual Field Analyzer

Perimeter that maps central and peripheral vision.

- Automated testing
- Glaucoma & neuro

06.08

Slit Lamp

Biomicroscope for magnified examination of the eye's front structures.

- Adjustable slit beam
- Routine eye exams

06.09

Surgical Microscope

Floor-stand operating microscope for eye and microsurgery.

- High magnification
- Theatre use

06.10

Fundus Camera with FFA

Retinal camera with fluorescein angiography for imaging the back of the eye.

- Colour & FFA imaging
- Retina clinics

06.11

Lens Drill Machine

Drilling machine for mounting lenses in rimless spectacle frames.

- Precise drilling
- Optical workshops

06.12

Indirect Ophthalmoscope

Head-mounted ophthalmoscope for wide-field retinal examination.

- Binocular view
- Peripheral retina

06.13

Refraction Unit

Combined chair and instrument stand for a complete eye examination.

- Patient chair
- Instrument arms

06.14

A-Scan

Ultrasound biometer that measures eye length for cataract lens calculation.

- Axial length
- IOL calculation

06.15

B-Scan

Ophthalmic ultrasound for imaging internal eye structures.

- Laptop-based
- Retina & vitreous

06.16

Manual Lensmeter

Optical lensmeter for manually reading spectacle lens power.

- Manual reading
- Optical shops

06.17

Auto Phoropter

Motorised phoropter for fast, accurate subjective refraction.

- Tablet control
- Digital workflow

06.18

Synoptophore

Instrument for assessing and treating binocular vision and squint.

- Orthoptic tests
- Squint therapy

06.19

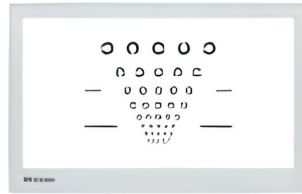

Groover

Lens groover that cuts grooves for mounting lenses in semi-rimless frames.

- Adjustable depth
- Optical workshops

06.20

LCD Vision Chart

Digital LCD acuity chart with selectable test optotypes.

- Multiple test types
- Remote control

06.21

Motorised Table

Electric height-adjustable table for ophthalmic instruments.

- Motorised lift
- Castor base

06.22

OCT Machine

Optical coherence tomography system for high-resolution retinal scans.

- Retinal imaging
- Disease tracking

06.23

Hand-Held Refractometer

Portable autorefractor for refraction screening at the bedside or in the community.

- Battery powered
- Screening camps

06.24

Portable Autorefractor

Handheld autorefractor for quick vision screening of children and adults.

- Child friendly
- Portable

06.25

Manual Phoropter

Manual refractor head for subjective refraction testing.

- Full lens range
- Refraction rooms

06.26

Direct Ophthalmoscope

Handheld ophthalmoscope for routine retinal checks.

- Selectable lenses
- GP & eye clinics

06.27

Rebound Tonometer

Handheld rebound tonometer that measures eye pressure with a light probe touch.

- No drops needed
- Portable

06.28

PD Meter

Digital pupillometer that measures pupillary distance for spectacle fitting.

- Digital readout
- Optical shops

06.29

Frame Warmer

Warms plastic frames so they can be shaped for a comfortable fit.

- Quick heat-up
- Frame fitting

06.30

Vision Screener

Handheld screener that detects vision problems quickly, especially in children.

- Fast screening
- Schools & clinics

06.31

Trial Lens Set

Complete set of trial lenses in a carry case for manual refraction.

- Full lens range
- Carry case

06.32

Trial Frame

Adjustable frame that holds trial lenses during eye tests.

- Adjustable PD
- Lightweight

07.32	X-Ray Plate Scanner	35

07.01

Dental Chair

Complete dental unit with patient chair, operating light, delivery system and monitor.

- Integrated delivery
- Operating light

07.02

Portable Dental X-Ray

Handheld intraoral X-ray unit for chairside imaging.

- Handheld
- Chairside imaging

07.03

Autoclave

Steam steriliser for dental instruments and handpieces.

- Touch-screen
- Instrument sterilisation

07.04

Light Cure

LED curing light that hardens composite fillings.

- Cordless handpiece
- LED curing

07.05

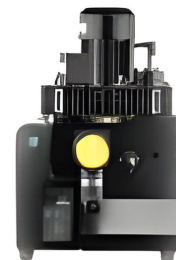

Dental Headlight

Head-mounted LED light with loupes for a clear view of the mouth.

- Hands-free light
- Magnifying loupes

07.06

Dental Suction Machine

Suction unit that removes saliva, water and debris during treatment.

- Strong suction
- Clinic use

07.07

Implant Motor

Surgical motor system for placing dental implants.

- Contra-angle handpiece
- Foot control

07.08

Apex Locator

Electronic device that measures root canal length during endodontic treatment.

- Colour display
- Endodontics

07.09

Water Distiller

Distiller producing pure water for autoclaves and dental units.

- Glass collection jug
- Autoclave water

07.10

Dental Instrument Kit

Set of examination and hand instruments on a stainless tray.

- Stainless steel
- Exams & procedures

07.11

Sealing Machine

Heat sealer for sterilisation pouches and rolls.

- Roll holder
- Sterile packing

07.12

Whitening Machine

LED teeth-whitening lamp on a mobile stand.

- Adjustable arm
- Cosmetic dentistry

07.13

RVG Sensor

Digital intraoral X-ray sensor that sends images straight to the computer.

- Instant images
- Digital radiography

07.14

Hand Piece

High-speed dental handpieces for cutting and polishing.

- High speed
- Restorative work

07.15

Intraoral Camera

Intraoral camera with monitor for showing patients their teeth.

- Live display
- Patient education

07.16

Dental Scaler

Ultrasonic scaler for removing plaque and calculus.

- Ultrasonic
- Periodontal care

07.17

Dental X-Ray

Wall-mounted intraoral X-ray unit with articulated arm.

- Articulated arm
- Intraoral imaging

07.18

Endomotor

Endodontic motor with handpiece for root canal shaping.

- Torque control
- Rotary files

07.19

Dental Anesthesia Unit

Mobile anaesthesia unit for sedation during dental procedures.

- Gas flow control
- Mobile stand

07.20

OPG / Panoramic X-Ray

Panoramic X-ray system for full-mouth and jaw imaging.

- Panoramic view
- Ceph arm

07.21

Dental Laser

Soft-tissue dental laser for precise, minimally invasive procedures.

- Touch-screen
- Soft-tissue surgery

07.22

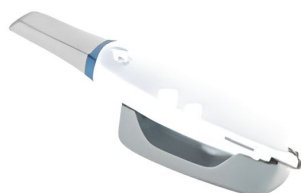

Micromotor

Lab micromotor with handpiece for trimming and polishing prosthetics.

- Variable speed
- Lab work

07.23

3D Intraoral Scanner

Intraoral scanner that captures digital impressions without impression trays.

- Digital impressions
- CAD/CAM ready

07.24

CAD/CAM Milling Machine

Milling unit that fabricates crowns and restorations from digital designs.

- Chairside milling
- Crowns & bridges

07.25

Mobile Dental Cabinet

Mobile multi-drawer cabinet for dental supplies.

- Many drawers
- Castors

07.26

Dental Compressor

Air compressor that supplies clean compressed air to dental units.

- Air tank
- Dental units

07.27

Dental Furnace

Furnace for firing and sintering dental ceramics.

- Programmable cycles
- Ceramic lab

07.28

Dental Sand Blasting Unit

Sandblaster for cleaning and preparing dental prostheses.

- Viewing window
- Lab finishing

07.29

Dental Die Cutting Unit

Lab unit for sawing dental models and dies.

- Precise cuts
- Model work

07.30

Dental Lab Motor

Benchtop lab motor with handpiece and foot control.

- Foot control
- Lab work

07.31

Dental Stool

Ergonomic saddle stool for dentists and assistants.

- Saddle seat
- Height adjustable

07.32

X-Ray Plate Scanner

Scanner that digitises phosphor imaging plates for digital dental X-rays.

- Phosphor plates
- Digital workflow

08.11	Blood Gas Analyzer	38	08.22	Blood Mixer	39			

08.01

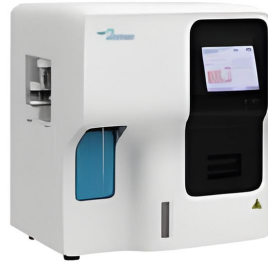

Microscope

Binocular laboratory microscope for blood, tissue and microbiology samples.

- Multiple objectives
- Built-in illumination

08.02

Hematology Analyzer

Automated cell counter that delivers a complete blood count (CBC).

- Touch-screen
- CBC parameters

08.03

Electrolyte Analyzer

Measures sodium, potassium and chloride in blood and urine.

- Na / K / Cl
- Compact

08.04

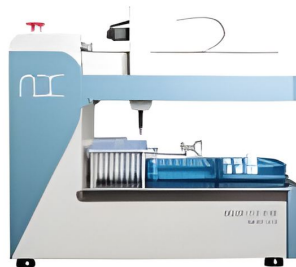

Coagulation Analyzer

Analyzer for clotting tests such as PT and APTT.

- Multi-channel
- Clotting tests

08.05

Auto ELISA Processor

Automated system that processes ELISA microplates from pipetting to reading.

- Walk-away processing
- Immunology

08.06

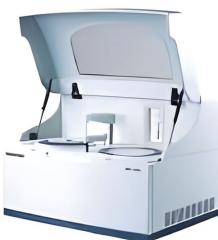

Immunoassay Analyzer

Automated analyzer for hormone, cardiac and infectious-disease markers.

- Automated
- Wide test menu

08.07

Biochemistry Analyzer

Fully automated clinical chemistry analyzer for routine panels.

- High throughput
- Routine chemistry

08.08

Semi-Auto Chemistry Analyzer

Compact semi-automatic analyzer for low-to-mid volume chemistry testing.

- Compact
- Small labs

08.09

Thermal Cycler

PCR thermal cycler for DNA and RNA amplification.

- Touch-screen
- Molecular testing

08.10

Urine Analyzer

Strip reader for fast, consistent routine urinalysis.

- Automatic reading
- Routine urinalysis

08.11

Blood Gas Analyzer

Measures blood gases, pH and electrolytes for critical care decisions.

- Rapid results
- Critical care

08.12

Spectrophotometer

Measures the light absorbance of samples for laboratory assays.

- Digital display
- Assays & QC

08.13

Dry Oven

Hot-air oven for drying and sterilising laboratory glassware.

- Temperature control
- Dry heat

08.14

Laboratory Incubator

Temperature-controlled incubator for cultures and samples.

- Digital control
- Microbiology

08.15

Centrifuge

Benchtop centrifuge for separating blood and other samples.

- Digital control
- Safety lid

08.16

Refrigerated Centrifuge

Centrifuge with built-in cooling for temperature-sensitive samples.

- Cooling system
- Sample integrity

08.17

Water Bath Shaker

Heated water bath with shaking platform for incubation and mixing.

- Temperature control
- Shaking action

08.18

Automatic Sterilizer

Large automatic autoclave for laboratory media and equipment.

- Automatic cycles
- High capacity

08.19

Horizontal Laminar Flow Cabinet

Clean-air bench that protects samples from contamination.

- Filtered airflow
- Sterile work area

08.20

Portable Sterilizer

Vertical autoclave for sterilising smaller loads.

- Compact
- Steam sterilisation

08.21

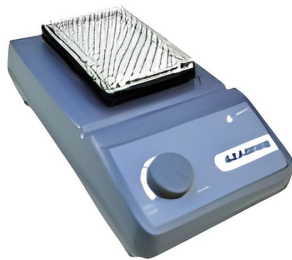

Magnetic Stirrer

Hotplate stirrer that mixes liquids with a magnetic bar.

- Heating & stirring
- Speed control

08.22

Blood Mixer

Mixer that gently agitates blood tubes and samples.

- Gentle mixing
- Sample preparation

08.23

CO2 Incubator

Incubator that controls temperature and CO2 for cell culture.

- CO2 control
- Cell culture

08.24

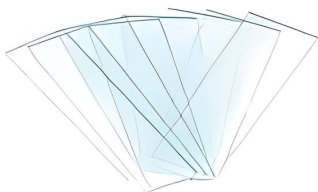

Pipette

Adjustable single and multichannel micropipettes for accurate liquid handling.

- Adjustable volume
- Multichannel option

08.25

Microscope Slides

Glass slides for mounting specimens for microscopy.

- Clear glass
- Boxed

08.26

Cover Glass

Thin cover slips placed over specimens on slides.

- Ultra-thin
- Boxed

08.27

Graduated Pipette

Glass graduated pipettes for measured liquid transfer.

- Clear markings
- Lab glassware

08.28

Parafilm

Stretchable laboratory sealing film for tubes, flasks and plates.

- Moisture resistant
- Self-sealing

08.29

Volumetric Flask & Centrifuge Tubes

Volumetric flasks and graduated centrifuge tubes for sample preparation.

- Accurate volumes
- Lab essentials

08.30

Pipette Tips

Disposable tips for micropipettes in standard volume ranges.

- Colour-coded
- Disposable

08.31

Blood Specimen Tubes

Vacuum blood collection tubes with colour-coded caps.

- Colour-coded caps
- Venepuncture

08.32

PCR Plates

96-well plates for PCR and molecular testing.

- 96-well format
- Molecular labs

09

PRODUCT RANGE 09 / 19

Neonatology

Gentle care for the smallest patients.

FIG. 09 - BABY INCUBATOR

Warming, respiratory support and monitoring equipment for maternity units and NICUs.

IDEAL FOR

NICU

Maternity wards

Paediatric units

Community health

IN THIS RANGE - 13 PRODUCTS

PAGES 42-43

09.01	Infant Radiant Warmer	42
09.02	Baby Incubator	42
09.03	Baby Crib	42
09.04	Phototherapy Unit	42
09.05	MUAC Tape	42

09.06	Flexible Measuring Mat	42
09.07	Nasal CPAP Unit	42
09.08	Jaundice Meter	42
09.09	Transport Incubator	42
09.10	Bubble CPAP Machine	43

09.11	Infant Oxygen Hood	43
09.12	Vein Finder	43
09.13	Infant Apnea Monitor	43

09.01

Infant Radiant Warmer

Overhead radiant heater that keeps newborns warm during care and resuscitation.

- Open-care bed
- Delivery & NICU

09.02

Baby Incubator

Enclosed, heated incubator for premature and sick newborns.

- Controlled climate
- Access portholes

09.03

Baby Crib

Hospital crib with clear bassinet for healthy newborns.

- Clear bassinet
- Storage shelf

09.04

Phototherapy Unit

Blue-light LED unit for treating newborn jaundice.

- LED light source
- Adjustable stand

09.05

MUAC Tape

Colour-banded tape that measures mid-upper arm circumference to screen for malnutrition.

- Colour-coded zones
- Field screening

09.06

Flexible Measuring Mat

Roll-up mat for accurately measuring infant length.

- Roll-up design
- Growth monitoring

09.07

Nasal CPAP Unit

Neonatal CPAP system providing gentle airway pressure through nasal prongs.

- Non-invasive support
- NICU

09.08

Jaundice Meter

Transcutaneous meter that screens newborn jaundice without a blood test.

- Non-invasive
- Instant reading

09.09

Transport Incubator

Mobile incubator on a trolley for safe transfer of newborns.

- Mobile trolley
- Inter-hospital transfer

09.10

Bubble CPAP Machine

Bubble CPAP system providing simple, effective respiratory support to infants.

- Humidified flow
- NICU & SCBU

09.11

Infant Oxygen Hood

Clear hood that delivers oxygen around an infant's head without a mask.

- Clear hood
- Oxygen therapy

09.12

Vein Finder

Handheld vein illuminator that helps locate veins in infants and children.

- Handheld
- Paediatric IV access

09.13

Infant Apnea Monitor

Monitors infant breathing and alarms if breathing pauses.

- Breathing sensor
- Audible alarm

10.13	Ultrasound Machine	46
10.14	Thermal Printer & Paper	46
10.15	X-Ray Films	46
10.16	Portable X-Ray	46

10.01

X-Ray Machine

Stationary radiography system with table and wall stand for general imaging.

- Table & wall stand
- Chest & bone imaging

10.02

MRI Scanner

Magnetic resonance scanner producing detailed soft-tissue images.

- No ionising radiation
- Neuro & MSK

10.03

CT Scanner

Computed tomography scanner for fast cross-sectional body imaging.

- Cross-sectional imaging
- Trauma & oncology

10.04

Lead Barrier

Mobile lead-lined screen with viewing window that shields staff from radiation.

- Viewing window
- On castors

10.05

C-Arm Radiography

Mobile C-arm providing real-time X-ray imaging during surgery.

- Real-time imaging
- Theatre use

10.06

Mobile X-Ray

Wheeled X-ray unit for bedside imaging in wards and ICU.

- Bedside imaging
- Ward & ICU

10.07

Mammography System

Dedicated X-ray system for breast screening and diagnosis.

- Breast screening
- Acquisition station

10.08

CT-MRI Injector

Power injector for contrast media in CT and MRI scans.

- Programmable injection
- Contrast studies

10.09

CR System

Computed radiography reader that digitises X-ray cassettes.

- Film to digital
- Upgrades existing X-ray

10.10

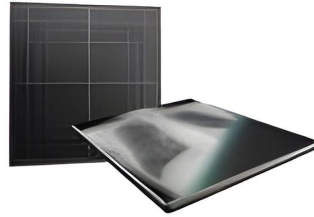

Film Printer

Dry medical film printer for diagnostic images.

- Dry printing
- Radiology output

10.11

DR Detector

Flat-panel digital detector for direct X-ray image capture.

- Instant images
- Digital radiography

10.12

Diagnostic Monitor

Medical-grade display for reviewing diagnostic images.

- High resolution
- Reporting stations

10.13

Ultrasound Machine

Cart-based ultrasound system for radiology departments.

- Multi-probe
- General imaging

10.14

Thermal Printer & Paper

Video thermal printer and paper for printing ultrasound images.

- Compact printer
- Ultrasound output

10.15

X-Ray Films

Radiographic film in standard sizes for X-ray imaging.

- Standard sizes
- Boxed

10.16

Portable X-Ray

Lightweight portable X-ray unit for bedside and emergency imaging.

- Mobile stand
- Bedside & field

11.30	Kinesiology Tape	51
11.31	Electrotherapy Electrodes	51
11.32	Acupuncture Needles	51

11.01

3-Section Electric Couch

Three-section electric treatment couch with height and section adjustment.

- Electric height
- Face cut-out

11.02

2-Section Electric Couch

Two-section electric couch for treatment and examination.

- Electric height
- Adjustable backrest

11.03

Physiotherapy Examination Table

Multi-section table for manual therapy and chiropractic treatment.

- Multi-section
- Manual therapy

11.04

Medical Vibrator

Vibration massage device on a mobile stand for muscle relaxation.

- Variable intensity
- Mobile stand

11.05

Mobile Stim

Portable electrotherapy stimulator for muscle and nerve stimulation.

- Preset programmes
- Portable

11.06

Shoulder Exerciser

Wall-mounted wheel that helps restore shoulder range of motion.

- Wall mounted
- Range of motion

11.07

Hydrocollator

Heating unit that keeps hot packs ready for moist heat therapy.

- Thermostatic
- Hot-pack storage

11.08

Shortwave Diathermy

Shortwave unit that delivers deep heat to tissues.

- Deep heating
- Twin applicator arms

11.09

Digital TENS

Digital TENS unit for drug-free pain relief through nerve stimulation.

- Preset programmes
- Pain management

11.10

Combination Therapy Unit

Combined electrotherapy and ultrasound system on one platform.

- Electro & ultrasound
- Touch-screen

11.11

Laser Therapy Unit

Therapeutic laser for pain relief and tissue healing.

- Low-level laser
- Pain & healing

11.12

Shockwave Machine

Extracorporeal shockwave therapy for chronic tendon and muscle pain.

- ESWT
- Sports medicine

11.13

Pedal Exerciser

Compact pedal exerciser for arm and leg mobility.

- Compact & portable
- Arm or leg use

11.14

Finger Ladder

Wall-mounted ladder for finger, hand and shoulder rehabilitation.

- Wooden steps
- Range of motion

11.15

Theraband Station

Wall-mounted station for resistance band exercises.

- Multiple heights
- Strength training

11.16

Traction Unit

Traction system for cervical and lumbar spine therapy.

- Programmable traction
- Neck & back

11.17

Compression Therapy Unit

Air compression system that reduces swelling and improves circulation.

- Sequential compression
- Lymphoedema care

11.18

CPM Machine

Continuous passive motion device for knee recovery after surgery.

- Adjustable range
- Post-op rehab

11.19

Exercise Bike

Upright exercise bike for cardiovascular rehabilitation.

- Adjustable seat
- Cardio rehab

11.20

Exercise Pulleys

Overhead pulley set for shoulder and arm exercises.

- Overhead mount
- Shoulder rehab

11.21

Pocket TENS

Pocket-size TENS unit for pain relief at home or on the go.

- Pocket size
- Home therapy

11.22

Dumbbell Set

Coated hand weights for strengthening exercises.

- Coated grip
- Strength training

11.23

Wax Bath

Paraffin wax bath for heat therapy of the hands and feet.

- Even heat
- Arthritis relief

11.24

Parallel Bars

Height-adjustable parallel bars for gait training.

- Adjustable height
- Gait training

11.25

Gel & Lotion

Ultrasound gel and massage lotion for therapy sessions.

- Bulk & bottles
- Therapy use

11.26

Theraband

Elastic resistance bands in graded strengths.

- Colour-coded resistance
- Home exercise

11.27

Foam Roller

Foam roller for myofascial release and stretching.

- Lightweight
- Recovery

11.28

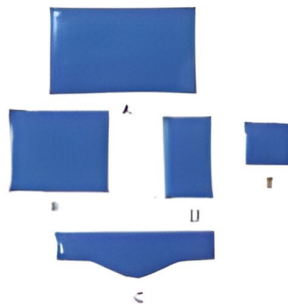

Physio Ball

Exercise ball for core strength, balance and rehabilitation.

- Core & balance
- Durable

11.29

Cold Pack

Reusable cold packs in assorted shapes for cryotherapy.

- Assorted shapes
- Reusable

11.30

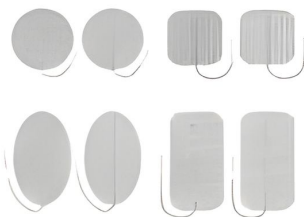

Kinesiology Tape

Elastic therapeutic tape that supports muscles and joints.

- Breathable
- Sports taping

11.31

Electrotherapy Electrodes

Self-adhesive electrode pads for TENS and stimulation units.

- Self-adhesive
- Reusable

11.32

Acupuncture Needles

Sterile single-use acupuncture needles in assorted sizes.

- Sterile
- Assorted sizes

12.08	Cool Box	54

12.09	Dialysis Machine	54
12.10	RO System	54
12.11	Portable RO	54
12.12	Dialysis Consumables	54

12.01

Pharmacy Refrigerator

Medical refrigerator with glass doors for storing medicines and vaccines.

- Temperature display
- Glass doors

12.02

Solar Medical Refrigerator

Solar-powered vaccine refrigerator for off-grid clinics.

- Solar panel
- Vaccine storage

12.03

Controlled Rate Freezer

Freezer that cools samples at a controlled rate for cryopreservation.

- Programmed cooling
- Biobanking

12.04

Blood Bank Refrigerator

Refrigerator with drawers and display for storing blood products.

- Touch display
- Blood products

12.05

-25°C Biomedical Freezer

Upright biomedical freezer for reagents and samples at -25°C.

- -25°C storage
- Upright

12.06

-40°C Biomedical Freezer

Low-temperature freezer for plasma and biological samples at -40°C.

- -40°C storage
- Plasma & samples

Any brand or model

Tell us the manufacturer, model or specification you need.

Spares & accessories

Replacement parts, probes, cables and consumables.

Complete projects

Full room and facility packages on a single quotation.

12.07

Towel Warmer

Warming cabinet that keeps towels and linens warm for patient comfort.

- Digital control
- Glass door

12.08

Cool Box

Insulated cool box for transporting vaccines and samples.

- Insulated
- Carry handle

12.09

Dialysis Machine

Haemodialysis machine for kidney replacement therapy.

- Touch-screen
- Haemodialysis

12.10

RO System

Reverse osmosis water treatment plant that supplies dialysis-grade water.

- Multi-stage filtration
- Dialysis units

12.11

Portable RO

Mobile RO unit that supplies purified water at the bedside.

- On castors
- Bedside dialysis

12.12

Dialysis Consumables

Dialysers, bloodlines, fistula needles and related consumables.

- Complete range
- Single use

PRODUCT RANGE 13 / 19

Aesthetic & Dermatology

Skin, beauty and confidence.

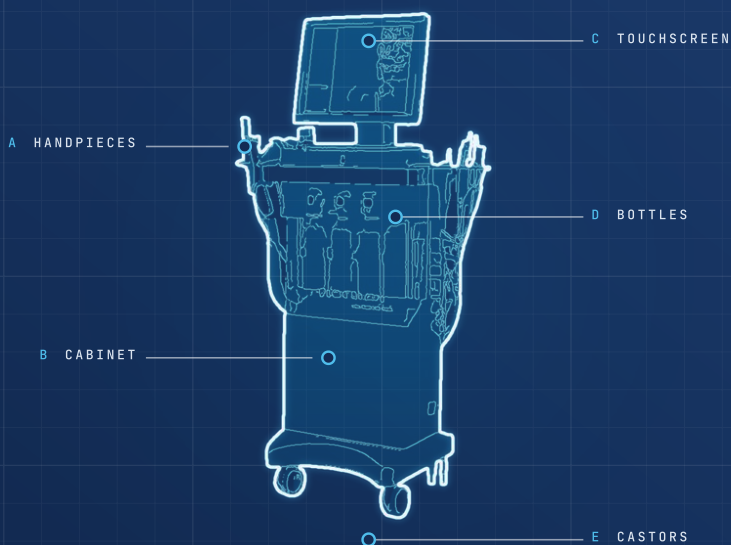

FIG. 13 — HYDRA FACIAL

Laser, facial and dermatology equipment for aesthetic clinics and skin specialists.

IDEAL FOR

Aesthetic clinics

Dermatologists

Spas

Hair restoration

IN THIS RANGE — 16 PRODUCTS

PAGES 56-57

13.01	Laser Hair Removal	56
13.02	Hydra Facial	56
13.03	Laser Slimming Machine	56
13.04	Robotic Hair Restoration Machine	56
13.05	Facial Steamer	56
13.06	IR Lamp	56

13.07	Derma Chair	56
13.08	Spa Table	56
13.09	Liposuction Machine	56
13.10	Derma Cautery	57
13.11	Derma Pen	57
13.12	Photobiomodulation Laser	57

13.13	Wood's Lamp	57
13.14	Dermatoscope	57
13.15	Battery Cautery	57
13.16	Magnifying Lamp	57

13.01

Laser Hair Removal

Laser system for long-lasting hair reduction.

- Articulated handpiece
- Aesthetic clinics

13.02

Hydra Facial

Multi-function facial system for cleansing, exfoliation and hydration.

- Multiple handpieces
- Touch-screen

13.03

Laser Slimming Machine

Body-contouring system for non-invasive fat reduction.

- Body contouring
- Non-invasive

13.04

Robotic Hair Restoration Machine

Robotic system that assists hair-transplant procedures.

- Robotic precision
- Hair transplant

13.05

Facial Steamer

Facial steamer that softens skin and opens pores before treatment.

- Adjustable arm
- Spa & clinic

13.06

IR Lamp

Infrared lamp on a stand for skin and therapeutic warming.

- Adjustable head
- Mobile stand

13.07

Derma Chair

Multi-position treatment chair for dermatology and aesthetic procedures.

- Multi-position
- Padded

13.08

Spa Table

Premium spa and treatment table with storage base.

- Padded top
- Storage base

13.09

Liposuction Machine

Aspiration system for liposuction and body contouring.

- Collection canisters
- Mobile cart

13.10

Derma Cautery

Electrosurgical unit for removing skin lesions.

- Cut & coagulate
- Minor surgery

13.11

Derma Pen

Microneedling pen for skin rejuvenation and scar treatment.

- Adjustable depth
- Collagen induction

13.12

Photobiomodulation Laser

Low-level laser for skin healing and rejuvenation.

- Multiple probes
- Safety goggles

13.13

Wood's Lamp

UV lamp that highlights skin infections and pigment changes.

- UV examination
- Magnifier

13.14

Dermatoscope

Handheld dermatoscope for magnified examination of skin lesions.

- Built-in light
- Mole mapping

13.15

Battery Cautery

Battery-powered cautery pen for small procedures.

- Cordless
- Single use

13.16

Magnifying Lamp

Magnifying lamp on a mobile stand for close-up skin work.

- Magnifying lens
- Mobile stand

14

PRODUCT RANGE 14 / 19

Gynecology

Care for women at every stage.

FIG. 14 - GYNECOLOGY COUCH

Examination, delivery, monitoring and minimally invasive tools for women's health.

IDEAL FOR

Maternity hospitals

OB/GYN clinics

IVF centres

Day surgery

IN THIS RANGE - 16 PRODUCTS

PAGES 59-60

14.01	Gynecology Couch	59
14.02	Delivery Bed	59
14.03	Fetal Monitor	59
14.04	Gynecology Ultrasound	59
14.05	Colposcope	59
14.06	Fetal Doppler	59

14.07	Cryosurgery Unit	59
14.08	Mini Cryo Gun	59
14.09	Vaginal Speculum	59
14.10	Pregnancy Test Kit	60
14.11	Ultrasound Probe Cover	60
14.12	Versascope	60

14.13	Laparoscopic Smoke Filter	60
14.14	Elastic Retraction System	60
14.15	Bipolar Loop	60
14.16	Cordless Ablation Device	60

14.01

Gynecology Couch

Adjustable examination couch with leg supports for gynaecological exams.

- Leg supports
- Adjustable sections

14.02

Delivery Bed

Multi-position labour and delivery bed.

- Multi-position
- Leg holders

14.03

Fetal Monitor

CTG monitor that records fetal heart rate and contractions.

- Built-in printer
- Antenatal care

14.04

Gynecology Ultrasound

Cart-based ultrasound for obstetric and gynaecological scans.

- Obstetric imaging
- Multi-probe

14.05

Colposcope

Video colposcope for magnified examination of the cervix.

- Video display
- Cervical screening

14.06

Fetal Doppler

Handheld Doppler for listening to the fetal heartbeat.

- Pocket size
- Antenatal checks

14.07

Cryosurgery Unit

Cryotherapy device for freezing abnormal cervical tissue.

- Cryotherapy
- Outpatient treatment

14.08

Mini Cryo Gun

Handheld cryo spray for gynaecology and skin lesions.

- Interchangeable tips
- Handheld

14.09

Vaginal Speculum

Speculum for holding the vaginal walls open during examination.

- Stainless steel
- Examination

14.10

Pregnancy Test Kit

Rapid urine pregnancy test with an easy-to-read result.

- Fast result
- Simple to use

14.11

Ultrasound Probe Cover

Sterile cover for ultrasound and transvaginal probes.

- Sterile
- Infection control

14.12

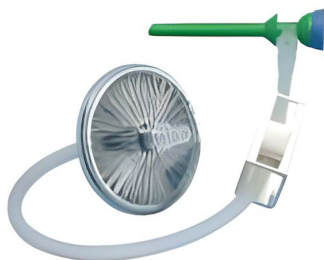

Versascope

Slim hysteroscopy sheath for office diagnostic and operative procedures.

- Slim profile
- Office hysteroscopy

14.13

Laparoscopic Smoke Filter

Filter that removes surgical smoke during laparoscopy.

- Smoke evacuation
- Clear view

14.14

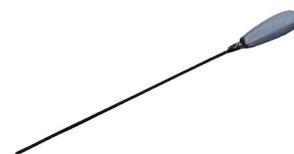

Elastic Retraction System

Self-retaining elastic retractor for surgical exposure.

- Hands-free retraction
- Minimally invasive

14.15

Bipolar Loop

Bipolar loop electrode for gynaecological electrosurgery.

- Precise cutting
- Hysteroscopy

14.16

Cordless Ablation Device

Cordless device for endometrial tissue ablation.

- Cordless
- Outpatient use

15

PRODUCT RANGE 15 / 19

ICU & Critical Care

When every second counts.

FIG. 15 - ICU VENTILATOR

Ventilation, infusion, monitoring and support equipment for intensive care units.

IDEAL FOR

ICU

CCU

NICU

Emergency rooms

IN THIS RANGE - 16 PRODUCTS

PAGES 62-63

15.01	ICU Ventilator	62
15.02	Neonatal Ventilator	62
15.03	Defibrillator	62
15.04	Patient Monitor	62
15.05	Syringe Pump	62
15.06	Infusion Pump	62

15.07	CPAP Machine	62
15.08	DVT Pump	62
15.09	Fluid Warmer	62
15.10	Blood Warmer	63
15.11	ICU Bed	63
15.12	ABG Machine	63

15.13	Bed Head Unit	63
15.14	Multifunctional Airway Cart	63
15.15	Suction Machine	63
15.16	Intubation Kit	63

15.01

ICU Ventilator

Adult ICU ventilator with touch-screen control for invasive and non-invasive ventilation.

- Invasive & NIV
- Touch-screen

15.02

Neonatal Ventilator

Ventilator designed for newborn and paediatric patients.

- Neonatal modes
- Mobile stand

15.03

Defibrillator

Monitor-defibrillator for resuscitation in critical care.

- Monitor & shock
- Crash response

15.04

Patient Monitor

Multi-parameter monitor for ECG, SpO2, NIBP and more.

- Large display
- Multi-parameter

15.05

Syringe Pump

Precise pump for continuous delivery of small drug volumes.

- Accurate dosing
- ICU & NICU

15.06

Infusion Pump

Volumetric pump for controlled IV fluid delivery.

- Programmable rate
- Alarms

15.07

CPAP Machine

Device that delivers continuous airway pressure for sleep apnoea and respiratory support.

- Humidifier
- Sleep apnoea

15.08

DVT Pump

Intermittent compression pump that helps prevent deep-vein thrombosis.

- Leg sleeves
- Post-surgery

15.09

Fluid Warmer

Warms IV fluids to body temperature before infusion.

- Digital display
- Prevents hypothermia

15.10

Blood Warmer

Warms blood and blood products during transfusion.

- Pole mount
- Transfusion safety

15.11

ICU Bed

Fully featured electric critical-care bed.

- Electric positions
- Side rails

15.12

ABG Machine

Point-of-care arterial blood gas analyzer.

- Rapid results
- Critical care

15.13

Bed Head Unit

Wall panel providing medical gases, power and lighting at the bedside.

- Gas outlets
- Power & light

15.14

Multifunctional Airway Cart

Mobile cart with monitor and supplies for airway management.

- Monitor mount
- Storage

15.15

Suction Machine

Mobile suction unit for airway and surgical suction in ICU.

- Twin jars
- Mobile

15.16

Intubation Kit

Complete kit with laryngoscope blades, handles and airway accessories.

- Multiple blades
- Emergency airway

16.05	Manual Operating Table	65

16.06	OT LED Ceiling Light	65
16.07	Double Arm Pendant	65
16.08	Single Arm Pendant	65
16.09	Portable Operating Lamp	65
16.10	Surgical Tourniquet System	66

16.11	Electrosurgical Unit	66
16.12	Patient Warmer	66
16.13	OT Suction Unit	66

16.01

Anesthesia Machine

Anaesthesia workstation with ventilator, monitoring and gas delivery.

- Integrated ventilator
- Gas delivery

16.02

Laparoscopy Tower

Camera, light source and insufflation tower for laparoscopic surgery.

- Camera & light source
- Twin monitors

16.03

C-Arm

Mobile C-arm imaging system with viewing workstation for theatre.

- Real-time imaging
- Dual monitors

16.04

Electric Operating Table

Motorised operating table with multiple positioning functions.

- Remote control
- Multi-position

16.05

Manual Operating Table

Mechanically adjusted operating table for general surgery.

- Head & leg sections
- General surgery

16.06

OT LED Ceiling Light

Ceiling-mounted twin LED surgical lights.

- Twin light heads
- Adjustable arms

16.07

Double Arm Pendant

Ceiling pendant with two arms for gases, power and equipment.

- Gas & power outlets
- Equipment shelves

16.08

Single Arm Pendant

Single-arm ceiling pendant for gases and equipment in theatre and ICU.

- Rotating arm
- Shelves & outlets

16.09

Portable Operating Lamp

Mobile LED surgical lamp for minor procedures.

- Mobile stand
- LED light

16.10

Surgical Tourniquet System

Electronic tourniquet that controls limb blood flow during surgery.

- Dual channel
- Pressure control

16.11

Electrosurgical Unit

Generator for cutting and coagulation in surgery.

- Mono & bipolar
- Multiple modes

16.12

Patient Warmer

Forced-air warming unit that keeps patients warm during and after surgery.

- Forced air
- Prevents hypothermia

16.13

OT Suction Unit

High-flow mobile suction unit for operating theatres.

- Twin jars
- High flow

17.08	Wireless Ultrasound	68

17.01

Cardiac Ultrasound

Ultrasound platform optimised for echocardiography.

- Cardiac probes
- Colour Doppler

17.02

Gynecology Ultrasound

Ultrasound system for obstetric and women's health imaging.

- OB/GYN presets
- Multi-probe

17.03

Portable Color Doppler

Laptop-style colour Doppler ultrasound for point-of-care scanning.

- Colour Doppler
- Portable

17.04

General Ultrasound

Versatile cart-based ultrasound for abdominal and general imaging.

- Multi-specialty
- Cart based

17.05

Radiology Ultrasound

High-performance ultrasound for radiology departments.

- Advanced imaging
- Radiology

17.06

Portable Ultrasound

Compact black-and-white ultrasound for clinics and outreach.

- Compact
- Clinic & outreach

17.07

Handheld Ultrasound

Pocket ultrasound that connects to a tablet or phone.

- Pocket size
- Bedside scans

17.08

Wireless Ultrasound

Wireless probe that streams images to a smart device.

- Wireless probe
- Point-of-care
